

Wilmington Road Drilled Pier wall

Shortly after completion of 85 feet of a drilled pier wall on Wilmington Road just south of Corwin Road during the fall of 2018, another landslide occurred further south on the road and was closed in February 2019. A project is underway to repair the slope with a 200 foot stretch of a drilled pier wall. The project was designed by Terracon Consultants Inc. of Cincinnati and W.E. Smith Construction of Blanchester was awarded a contract to construct the pier wall project for \$269,584. The project is funded by the Warren County Engineer and the road is expected to reopen in early fall of this year.
